\* 25 Licenses is the minimum number of licenses available for schools.

**The Internet-Portal version is identical to the network version except that instead of saving the students' scores to your school server, that data is automatically saved to Barnum Software's web site.**

- Nothing on your server
- Students can continue working at home after school—even have tournaments with other students from their school while at home
- Free upgrades
- Annual subscription: It's a fraction of the normal, one-time network or site license price.

### The Internet-Portal CD can be installed onto ...

Windows 98, NT, 2000, ME, XP  
Macintosh Systems 8 through OS X (OS X with Classic)

Note: Some older computers might not have the minimum system requirements for using the Internet-Portal version. School and home users need email or web access.
